

Photo Instructions for your Wish For A Smile Trust Application

We need these **SIX** photos with your application.

Two photos are of you smiling- one is taken from the front
one is taken from the side

Four photos are of your teeth When taking photos of your teeth, it is useful to pull the lips back with spoons. It is important that you bite on your back teeth and **DO NOT** push your jaw forward when taking these photos. The photos will look better if you shine a torch in the mouth or stand in good light.
